

Task Force Phase II Work

Work Topic: Supplement, Not Supplant

Purpose: Clarifying basic education program offerings at the high school and situations for individual students

Summary: Supplement, not supplant is defined by ARM 10.55.905, Basic Education Program Offerings: High School; ARM 10.55.905, Graduation Requirements; and ARM 10.55.906 High School Credit. Distance, online, and technology delivered programs and course shall meet the learner expectations adopted by the school district, and be aligned with state content and performance standards.

Main Issue: Clarification of the approved rules as these apply to K-12 education situations

Questions:

- What are the circumstances that need to be clarified?
- What written advice and guidance are needed so districts have access to model examples?
- What are related issues? (e.g., Running Start Legislation)
- What policies should districts have in place?
- What should documentation look like? How will districts demonstrate that a student's needs are being met according to accreditation standards?
